

Maintenance Management Order

SUBJECT: Preventive Maintenance Guidelines for the
Change of Address Forms Processing System
(CFPS)

DATE: December 18, 2006

NO: MMO-131-06

TO: 1. Manager, Maintenance Support, Area
Offices
2. Maintenance Managers, CFS Offices
3. Supervisors, CFS Offices
4. Processing & Distribution Centers

FILE CODE: I4

tkos:mm05055af

This Maintenance Management Order (MMO) provides Preventive Maintenance (PM) guidelines for supporting the CFPS.

The minimum maintenance skill level to perform each task on these checklists is included in the Minimum Skill Level column. This does not preclude higher level employees from performing any of this work.

The work hours represented in this MMO reflect the maximum work hours required to maintain the equipment. Given local conditions, management may modify task frequencies.

The attached master checklists provide tasks to be performed at periodic intervals (Weekly, Monthly, and Semi-Annual), time required per task, and the minimum skill level for each task.

Maintenance Managers are to use these preventive maintenance guidelines when preparing the route sheets for local maintenance personnel. It is the responsibility of each Maintenance Manager to ensure all WARNINGS, CAUTIONS, and NOTES are included with each applicable task as part of the preparation of any local route sheets.

NOTE

If possible coordinate the weekly directory CD load with the Weekly PM route. Time to complete the software load has been included in the Weekly PM.

WARNING

Various products requiring Material Safety Data Sheets (MSDS) may be utilized during the performance of the procedures in this bulletin. Ensure the current MSDS for each product used is on file and available to all employees. When reordering such a product, it is suggested that current MSDS be requested. Refer to MSDS for appropriate personal protective equipment.

WARNING

The use of compressed or blown air is prohibited. When cleaning is required, an alternative cleaning method such as a HEPA filtered vacuum cleaner or a damp rag must be used in place of compressed or blown air. A lint-free cloth or brush may be used only on optical equipment when other cleaning methods can not be used.

For questions or comments concerning this bulletin contact the MTSC HelpDesk, either online at **MTSC>HELPDESK>Create/Update Tickets** or call (800) 366-4123.

MASTER CHECKLIST

03-CFPS-AA-001-M

WEEKLY

Time Total: 58 Minutes

Reference: MS-216, TL-3, October 1, 2004 or later for location of components, parts, and procedures.

NOTE

The weekly directory CD load should be coordinated with the Weekly PM if possible. Time to complete the software load has been included in the Weekly PM.

NOTE

Figures referred to in the following checklist are in attachment 5.

MAINTENANCE MANAGEMENT ORDER

MAINTENANCE MANAGEMENT ORDER

U.S. Postal Service Maintenance Checklist	IDENTIFICATION														
	WORK CODE		EQUIPMENT ACRONYM						CLASS CODE		NUMBER			TYPE	
	0	3	C	F	P	S				A	A	0	0	1	M
Equipment Nomenclature Change of Address Forms Processing System	Equipment Model						Bulletin Filename MM05055AF				Frequency WEEKLY				

Part or Component	Item No	Task Statement and Instruction (Comply with all current safety precautions)	Est. Time Req (min)	Min. Skill Lev	Thresholds		
					Run Hours	Pieces Fed (000)	Weeks

SAFETY STATEMENT

1. **COMPLY WITH ALL SAFETY PRECAUTIONS.** 1 All MIN
Disconnect power and apply lockouts when required by this instruction. Refer to current local lockout procedures to properly shutdown and lockout this machine. Open equipment and inspect dust conditions. Check for suspicious dust or unusual debris. If any unusual substance is found notify supervisor prior to proceeding with any further action on the equipment.

THE USE OF COMPRESSED OR BLOWN AIR IS PROHIBITED.

When cleaning is required, an alternative cleaning method such as a HEPA filtered vacuum cleaner or a damp rag must be used in place of compressed or blown air. A lint-free cloth or brush may be used on optical equipment only when other cleaning methods can not be used. Report safety deficiencies to your supervisor immediately upon detection.

NOTE

When this weekly procedure falls on the same day as monthly procedure, all covers or panels opened during weekly can be left open to complete monthly procedure. Also, the monthly lockout step will have already been performed in this procedure.

LOADING DIRECTORY

2. **Load weekly directory CD.** 10 11 MIN
 1. Log on the COA Server.
 2. If the COA Process Control status is OK, (see figure 1) from the Commands pull down menu select Stop COA System (see figure 2), to change the status to OFF.

NOTE

The COA Process Control status must be OFF (no COA Forms processing).

3. Attach removable CD/DVD player to the USB port of the COA server (front port).

MAINTENANCE MANAGEMENT ORDER

MAINTENANCE MANAGEMENT ORDER

U.S. Postal Service Maintenance Checklist	IDENTIFICATION													
	WORK CODE		EQUIPMENT ACRONYM						CLASS CODE		NUMBER			TYPE
	0	3	C	F	P	S				A	A	0	0	1
Equipment Nomenclature Change of Address Forms Processing System	Equipment Model						Bulletin Filename MM05055AF				Frequency WEEKLY			

Part or Component	Item No	Task Statement and Instruction (Comply with all current safety precautions)	Est. Time Req (min)	Min. Skill Lev	Thresholds		
					Run Hours	Pieces Fed (000)	Weeks

CAUTION

As software changes are made, this load procedure may change; check the latest SMO for load procedure.

4. Using the Tools pull down menu, select "Load Directories from CD" (see figure 3).
5. Insert the directory CD into the player.
6. As directed by the WINNT\System32\cmd.exe screen press Enter.
7. Wait for the following window, then click OK (see figure 4).

NOTE

See figure 5 for window displayed during the directory load.

8. Once the load is complete, press any key as directed by the WINNT\System32\cmd.exe window displaying the "Successfully Loaded" message.
9. From the COA server UI screen, using commands pull down window, select Start System to change the status window to OK (for COA Forms processing) (see figure 2).

NOTE

QSCAN and/or KFP will not go READY until individual task is started.

10. Verify that all subsystems status are ready.

COA SERVER

3. **Cleaning the COA server computer.**

6 11
MIN

Remove dust and dirt from the computer access door screen and cooling fan filter.

1. Using the commands pull down window, shut down the computer.

WARNING

Keep hands away from moving fan blades during computer shutdown.

MAINTENANCE MANAGEMENT ORDER

MAINTENANCE MANAGEMENT ORDER

U.S. Postal Service Maintenance Checklist	IDENTIFICATION														
	WORK CODE		EQUIPMENT ACRONYM						CLASS CODE		NUMBER			TYPE	
	0	3	C	F	P	S				A	A	0	0	1	M

Part or Component	Item No	Task Statement and Instruction (Comply with all current safety precautions)	Est. Time Req (min)	Min. Skill Lev	Thresholds		
					Run Hours	Pieces Fed (000)	Weeks

2. Open front panel/access door of COA server (see figure 6).
3. Grasp the fan filter holder and turn ¼ turn counter-clockwise to remove it from the fan housing.
4. Use vacuum to clean both sides of the filter.

WARNING

Keep hands away from moving fan blades when verifying operation of fan.

5. Keeping hands clear of fan blades, momentarily power-up the computer verify that fan turns, then power-off the computer. If the fan does not turn, replace the computer.
6. Return filter holder to its proper location against fan housing, line-up fan filter holder with slots in fan housing, press and turn filter holder ¼ turn clockwise to lock it in place.
7. Use vacuum to clean the screen on the computer access door.
8. Power-up the computer.
9. Check system to verify it is working properly.

MONITOR AND
KEYBOARD

4. **Cleaning the COA server peripherals.** 3 8
MIN
Clean the monitor and keyboard with a soft cloth or vacuum.
 1. Vacuum the keyboard with a brush.
 2. Using soft cloth wipe, clean monitor screen.
 3. Vacuum other dust from monitor casing.

CFPS SCANNER
(FOR COA
SCANNER SITES
ONLY)

5. **Cleaning scanner transport area.** 4 8
MIN
 1. Note current position of the paper guides.
 2. Open paper guides to the maximum width.
 3. Press Clear button to place scanner in Ready mode, if not ready (see figure 7).
 4. Press Cleaning Menu button on control panel.

U.S. Postal Service Maintenance Checklist		IDENTIFICATION													
		WORK CODE		EQUIPMENT ACRONYM						CLASS CODE		NUMBER			TYPE

					Run Hours	Pieces Fed (000)	Weeks

CFPS SCANNER
(CON'T)

5. Press the F1 key to start the scanner.
6. Raise the skimmer roller.
7. Place transport cleaning sheet from scanner kit, in feed tray and lower skimmer (the sheet should feed through the scanner).
8. Remove the sheet from the exit tray and feed it through again.
9. Remove sheet from exit tray and flip it over.
10. Repeat steps 7 and 8, twice.
11. Press the Stop button, then the Clear button (scanner should return to Ready mode in approx. 8 sec).
12. Return paper guides to the normal position.
13. Discard the used cleaning sheet.

CFPS SCANNER
(CON'T)

6. **Cleaning skimmer roller (feeder).** 5 8
MIN
 Dirty skimmer rollers may slip or cause multi-feeds. Clean the skimmer as required.
 1. Remove all documents from feed and exit trays.
 2. Press the Clear button to place scanner in the Ready mode, if not ready (see figure 7).
 3. Press Cleaning Menu key on Control Panel.
 4. Raise the skimmer roller.
 5. Press the F1 key to start the scanner.
 6. Using rubber tire cleaner and skimmer cleaning sheet from scanner kit spray, lightly dampen center leading edge of sheet (see figure 8).
 7. Place dampened end of skimmer cleaning sheet in feed position, hold the back of sheet with one hand (see figure 9).
 8. Lower the skimmer roller.
 9. While holding sheet, let skimmer roller spin on dampened area of sheet (roller should spin freely on sheet).

U.S. Postal Service Maintenance Checklist		IDENTIFICATION

					Run Hours	Pieces Fed (000)	Weeks

10. Allow the sheet be pulled slowly into the scanner and feed through the transport.
11. Remove the cleaning sheet from the exit tray, repeat steps 9, 10, and 11 three times.
12. Press the Stop button, then the Clear button (the scanner should return to the Ready mode in approximately 8 seconds).
13. Discard the used cleaning sheet.

CFPS SCANNER
(CON'T)

- | | | | |
|----|-----------------------------------|----------|----|
| 7. | Cleaning the page sensors. | 6
MIN | 11 |
|----|-----------------------------------|----------|----|
- Page sensors are located at the transport entry and at the back of the transport paper path.
1. Turn the scanner OFF.
 2. Open transport to its highest position, by lifting latch on lower right side of front cover (see figure 10).

NOTE

There are five pairs of sensors in the transport entry section, located behind the holes in the stainless transport plates at the front of the scanner. Also, in the paper path there are jam sensors.

CAUTION

Do not touch sensors with cotton swabs or anything else when cleaning them.

3. Vacuum sensor areas (top/bottom) and complete transport page path, including page sensors and jam sensors (see figure 11).
 4. Close the transport firmly.
- | | | | |
|----|------------------------------------|----------|---|
| 8. | Cleaning the feeder sensor. | 2
MIN | 8 |
|----|------------------------------------|----------|---|
1. Remove all paper from the feed tray.
 2. Vacuum feeder sensor area (see figure 12).
- | | | | |
|----|--------------------------|-----------|---|
| 9. | Clean glass flat. | 11
MIN | 8 |
|----|--------------------------|-----------|---|
- The glass flat is located inside the scanner

transport above the bottom read lamps.

NOTE

When scanner transport is opened, a safety interlock removes power from the transport.

CFPS SCANNER
(CON'T)

1. Open transport by lifting transport latch on the lower right side of the control panel upward.
2. Raise the cover to its highest position.
3. Place your index fingers on each side of the glass flat (see figure 13).
4. Press down slightly on the glass flat and slide it to the left until you can see right end.

CAUTION

Handle the glass flat by its edges to avoid smudges and scratches. Do not twist or turn glass flat while removing it.

5. Push down on the left end of the glass, the right end will rise slightly (see figure 14), grasp this end.
6. Holding the right side, gently pull the glass out scanner. Take care not to twist the glass.
7. Check the glass flat for chips and scratches.

NOTE

If glass flat is chipped or scratched, contact service representative/MTSC to replace it.

8. Using optic cleaning pad from scanner kit, carefully clean all surfaces of the glass flat.
9. Wipe the glass flat down with cleaning cloth dry, to eliminate streaking.
10. Replace the glass flat by grasping each end, placing left end in the track first.
11. Pressing down slightly on left and slide glass flat to left until the right end fits in the track.
12. Slide glass flat back to right until right and left

ends are about ¼" into its socket. When centered, glass flat is held in place by springs.

13. Close the transport cover firmly.

CFPS SCANNER
(CON'T)

10. **Checking scanner lamps.** 1 11

The lamps are cleaned during the monthly PM, replace as required.

1. Check the bulb icon () in the Control Panel display, if this icon is showing or flashing, replace lamp.
2. If a lamp needs replacing, contact the MTSC HelpDesk, and a service technician will be sent to replace it.

CFPS SCANNER
(CON'T)

11. **Cleaning the imprint head.** 5 11

Check/verify print quality, by priming and firing all nozzles on the imprint head.

1. On the control panel press CLEAR button to display the READY menu (see figure 15).
2. Press the RIGHT arrow until the FRONT PRINTER Menu is displayed (see figure 16).
3. Press F1 to turn the imprinter ON.
4. Press F3 to select CLEAN (see figure 17).
5. Insert a blank sheet of paper in the feed tray. Verify that the paper is wide enough for the imprinter to print on it.
6. Press F1 to select OK, the paper should feed (see figure 18).
7. Verify the control panel displays "CLEANING IMPRINTER" while the blank sheet is feeding through the scanner (see figure 19).
8. Remove the sheet of paper from the exit tray verify that a black rectangle is printed.

NOTE

The above action will prime and use all nozzles of the imprint head.

9. If there is no white streak(s) through the black

MAINTENANCE MANAGEMENT ORDER

rectangle go to step 13.

10. Cycle scanner power (OFF/ON) to pre-fire imprinter.
11. Repeat steps 5 through 9.

NOTE

If the problem persists, it may require priming or replacing the cartridge, contact the MTSC HelpDesk.

12. Once "Front Printer: ON" message appears press F1 to turn printer OFF (see figure 20).
13. Press the CLEAR button to return to READY menu (see figure 21).

CFPS SCANNER
(CON'T)

- | | | | |
|-----|-------------------------------------|----------|----|
| 12. | Clean the imprinter housing. | 3
MIN | 11 |
|-----|-------------------------------------|----------|----|
- Clean the imprinter and print cartridge, and check print cartridge ink level.
1. Open the scanner transport.
 2. Mark position of imprinter handle (see figure 22).
 3. Grasp imprinter handle, slide it to service position all the way to left side of scanner.
 4. Flip the print cartridge securing lever upward and over the cartridge (see figure 23).
 5. Grasp the print cartridge by its clear plastic tab and remove it from the imprinter.

CAUTION

When cleaning the print cartridge do not damage the foil below the ink cartridge.

6. Carefully remove dried ink from the bottom of print cartridge with a dry soft cloth.
7. Lay ink cartridge on its side (see figure 24).
8. Check ink level by observing bladder, if bladder lies real low in the cartridge, the ink level is too low.
9. If the ink is low, replace print cartridge. Refer to scanner print cartridge replacement

MAINTENANCE MANAGEMENT ORDER

MASTER CHECKLIST

03-CFPS-AA-002-M

MONTHLY

Time Total: 13 Minutes

Reference: MS-216, TL-3, October 1, 2004 or later for location of components, parts, and procedures.

NOTE

Figures referred to in the following checklist are in attachment 5.

MAINTENANCE MANAGEMENT ORDER

MAINTENANCE MANAGEMENT ORDER

U.S. Postal Service Maintenance Checklist	IDENTIFICATION														
	WORK CODE		EQUIPMENT ACRONYM						CLASS CODE		NUMBER			TYPE	
	0	3	C	F	P	S				A	A	0	0	2	M
Equipment Nomenclature Change of Address Forms Processing System	Equipment Model						Bulletin Filename MM05055AF				Frequency MONTHLY				

Part or Component	Item No	Task Statement and Instruction (Comply with all current safety precautions)	Est. Time Req (min)	Min. Skill Lev	Thresholds		
					Run Hours	Pieces Fed (000)	Weeks

SAFETY STATEMENT

1. **COMPLY WITH ALL SAFETY PRECAUTIONS.** 1 All MIN
Disconnect power and apply lockouts when required by this instruction. Refer to current local lockout procedures to properly shutdown and lockout this machine. Open equipment and inspect dust conditions. Check for suspicious dust or unusual debris. If any unusual substance is found notify supervisor prior to proceeding with any further action on the equipment.

THE USE OF COMPRESSED OR BLOWN AIR IS PROHIBITED.

When cleaning is required, an alternative cleaning method such as a HEPA filtered vacuum cleaner or a damp rag must be used in place of compressed or blown air. A lint-free cloth or brush may be used on optical equipment only when other cleaning methods can not be used. Report safety deficiencies to your supervisor immediately upon detection.

LOCKOUT

2. **Power down and lockout power.** Power down 1 All MIN
the machine and lockout its electrical power as prescribed by the current local lockout instructions providing lockout/restore procedures.

CFPS SCANNER (FOR COA SCANNER SITES ONLY)

3. **Cleaning the scanner lamps.** 5 8 MIN
1. Remove paper from exit tray.

NOTE

When the user access panel is opened, a safety interlock removes power from the transport. If the bulb icon () is displayed the lamps should be replaced.

2. Open the scanner transport.
3. Open the scanner left side access panel by folding it down (see figure 25).

WARNING

The lamps may be very HOT, use caution when removing the lamps.

MAINTENANCE MANAGEMENT ORDER

MAINTENANCE MANAGEMENT ORDER

U.S. Postal Service Maintenance Checklist	IDENTIFICATION													
	WORK CODE		EQUIPMENT ACRONYM						CLASS CODE		NUMBER		TYPE	
	0	3	C	F	P	S				A	A	0	0	2

Part or Component	Item No	Task Statement and Instruction (Comply with all current safety precautions)	Est. Time Req (min)	Min. Skill Lev	Thresholds		
					Run Hours	Pieces Fed (000)	Weeks

4. Remove the front lamp (1), then the back lamp (2), by grasping the green bulb housing and gently pull the lamp toward you (carefully slide the lamps out).
5. Using an optic cleaning pad (from the scanner kit); wipe the lamps until they are free of dust.
6. Replace the lamps by carefully sliding them back into the scanner and lamp sockets.

NOTE

If scanner does not operate properly or the light source is degraded, check the position of the lamps ensuring they are properly installed. If replacement is required, contact your service representative.

7. Close the side access panel and transport.
8. Power-up scanner and ensure it is operational.

CFPS SCANNER
(CON'T)

4. **Calibrating the CFPS scanner.** 5 11
MIN
Noise interferes with OCR readability and increases error rate and labor cost.
 1. Check COA form images for dirty looking images (see figure 26).
 2. If the images are not clear (see figure 27), take the following actions to clean it up.
 3. Log in with the maintenance account.
 4. Scan in an image that is known to cause bleed through (a dirty image).
 5. Select STOP and allow the image to be injected (see figure 28).
 6. Move the SCAN window to the lower left corner of the screen (see figure 29).
 7. Move the mouse to the lower right part of the screen and expose the start bar.
 8. Double click on the Virtual Rescan icon in the Windows tray area, located next to the time (see figure 30).

U.S. Postal Service Maintenance Checklist	IDENTIFICATION														
	WORK CODE		EQUIPMENT ACRONYM						CLASS CODE		NUMBER			TYPE	
	0	3	C	F	P	S				A	A	0	0	2	M
Equipment Nomenclature Change of Address Forms Processing System	Equipment Model						Bulletin Filename MM05055AF				Frequency MONTHLY				

Part or Component	Item No	Task Statement and Instruction (Comply with all current safety precautions)	Est. Time Req (min)	Min. Skill Lev	Thresholds		
					Run Hours	Pieces Fed (000)	Weeks

9. Using contrast slide bar, adjust to point where drop out color truly drops out (see figure 31).
10. If scripting of the form begins to deteriorate, adjust the brightness and gamma slide bars to achieve optimum dropout (see figure 32).

NOTE

Items to be aware of:

- Do not degrade patron scripting
 - Leave OFFICIAL MAIL FORWARDING bar black at the top of the form
 - All that is not a drop out color, should be legibly exposed (i.e. fine print writing)
 - This may need to be repeated with a number of different scripted forms (various inks, colors, pencils) to gain optimum adjustment.
11. Save settings by clicking on the Profile tab (see figure 33).
 12. Click Save, then click Apply Batch.
 13. If scan window is still active, from CFPS UI, click COMMANDS select STOP SCAN.
 14. If SCAN window has timed out, click COMMANDS select START SCAN, and move scan window to expose the counters and the Current Login information bar (see figure 34).
 15. Allow SCAN window to time out to save its location settings, then start the scan by clicking COMMANDS select START SCAN
 16. Ensure proper location of scan window. If the window is concealing counters, go to step 13.
 17. From the CFPS UI screen click COMMANDS, select STOP SCAN and release back to operations.

CLEAN UP

5. **Clean up.** Ensure all tools, lubricants, rags, etc. 1 ALL are removed from the work area. Report all MIN deficiencies to your supervisor.

7. Verify that the fan works, by turning computer ON momentarily you should see fan blades moving. If not computer should be replaced.
8. Return the filter holder to its proper location in the filter holder housing, place the fan filter holder into the slots on the server front and turn ¼ turn clockwise to lock it in place.
9. Power ON the computer.
10. Check the system to verify it is working properly.

CLEAN UP

3. **Clean up.** Ensure all tools, lubricants, rags, etc., are removed from the work area. Report all deficiencies to your supervisor. 1 MIN All
