Maintenance Management Order UNITED STATES POSTAL SERVICE

SUBJECT: Bar Code Scanner TMS BCS Preventive **DATE:** December 18, 2013

Maintenance

NO: MMO-111-13

TO: All Novasort TMS Sites FILE CODE: TM

tpor:mm13051ac

This Maintenance Management Order (MMO) provides Operational and Preventive Maintenance Guidelines for the Novasort Scanning Station. This bulletin applies to Acronym BCS, Class Code EA.

The workhours indicated in the workload estimate (Attachment 1) reflect the *maximum* annual workhours required to maintain each system. Actual workhour requirements and the frequency of tasks are dependent on run time and pieces processed. Therefore, PM workhour requirements will vary day-to-day based on site specific machine utilization. Management may modify task frequencies to address local conditions.

The minimum maintenance skill level required to perform each task is included in the Minimum Skill Level column of each checklist. This does not preclude higher level employees from performing any of this work.

Preventive Maintenance (PM) guidelines provide maintenance employees with the recommended task based maintenance activities. The Electronic Conditioned Based Maintenance (eCBM) is an abbreviated task list that represents a portion of the PM checklist. The complete master PM checklist must be accessible to all maintenance employees when performing PM and eCBM task based maintenance activities.

WARNING

Various products requiring Material Safety Data Sheets (MSDS) may be utilized during the performance of the procedures in this bulletin. Ensure the current MSDS for each product used is on file and available to all employees. When reordering such a product, it is suggested that current MSDS be requested. Refer to MSDS for appropriate personal protective equipment.

WARNING

The use of compressed or blown air is prohibited. An alternative cleaning method such as a HEPA filtered vacuum cleaner, a damp rag, lint-free cloth, or brush must be used in place of compressed or blown air.

WARNING

Steps contained in this bulletin may require the use of Personal Protective Equipment (PPE). Refer to the current Electrical Work Plan (EWP) MMO for appropriate PPE requirements.

For questions or comments concerning this bulletin contact the MTSC HelpDesk, either online at MTSC>HELPDESK>Create/Update Tickets or call (800) 366-4123.

WORKLOAD ESTIMATE

FOR TMS NOVASORT SCANNING STATION

Attachment 1 i

THIS PAGE BLANK

ii Attachment 1

SUMMARY WORKLOAD ESTIMATE FOR TMS NOVASORT SCANNING STATION

Operation	Routine Servicing (hrs/yr)	Repair* (hrs/yr)	Routine Servicing + Repair Time (hrs/yr)	Non- productive Time** (hrs/yr)	Total Servicing Per Machine (hrs/yr)
Monthly	5.20	1.56	6.76	.68	7.44

NOTES:

- *Repair estimates based on 30% of servicing.
- **Based on 10% of total servicing and repair.

NOTE

The time shown does not allow for multiple assemblies on any equipment. Should multiple assemblies exist, the time must be modified at the local level to account for those occurrences. Other unique site conditions that require additional time are also to be addressed at the local level.

Component	INO	(Comply with all current salety precautions)	Req (min)	Lev	Run Hours	Pieces Fed (000)	Freq.
SAFETY STATEMENT	1	COMPLY WITH ALL SAFETY PRECAUTIONS. Disconnect power and apply lockouts when required by this instruction. Refer to current local lockout procedures to properly shutdown and lockout this machine. Open equipment and inspect dust conditions. Check for suspicious dust or unusual debris. If any unusual substance is found notify supervisor prior to proceeding with any further action on the equipment. THE USE OF COMPRESSED OR BLOWN AIR IS PROHIBITED. When cleaning is required, an alternative cleaning method such as a HEPA filtered vacuum cleaner or a damp rag must be used in place of compressed or blown air. A lint-free cloth or brush may be used on optical equipment only when other cleaning methods cannot be used. Report safety deficiencies to your supervisor immediately upon detection. WARNING FOR EWP/PPE: Steps contained in this bulletin may require the use of Personal Protective Equipment (PPE). Refer to the current Electrical Work Plan (EWP) MMO for appropriate PPE requirements.	3	All			
	2.	Lockout Power. Lockout the power distribution section associated with the area of the TMS you are working on and install a LOCKOUT/TAGOUT device.	2	All

BAR CODE SCANNERS	3.	WARNING The solid state lasers in the barcode scanners can cause eye damage if viewed directly. Avoid looking into the window when the scanner is energized. Using a soft-bristle brush or a clean, soft cloth dampened slightly with a mild detergent solution, clean all dust and debris from the external surfaces of the scanner (except the laser exit windows).	6	7					
SCANNER WINDOWS	4.	CLEAN SCANNER LASER EXIT WINDOWS. WARNING Clean the window of the scanner when the scanner is turned off. 1. Make a solution of seven parts denatured alcohol to three parts water. WARNING Discard or dispose of chemical soaked materials in accordance with MSDS and local procedures. 2. Clean the laser exit windows with a soft, lint-free cloth or lens paper moistened with the solution made in the previous step. Avoid abrasive substances. 3. Remove any streaks or remaining moisture from the windows with a dry, soft, lint-free cloth or lens paper.	6	7
